a plurality of light fixture coupling brackets adapted to couple to a light box,
each of the plurality of light fixture coupling brackets including a through-hole and
coupled to a light bar coupling device,
a first and second tightening handle,
wherein said plurality of light fixture coupling brackets adaptable to couple a light bar
having at least one light socket within said light box, said plurality of light fixture
coupling brackets adaptable to couple to a removably and adjustable gripping device,
~~wherein~~ said gripping device is rotatably adjusted around said light box, said gripping
device coupled with the first and second tightening handles and the plurality of light
fixture coupling brackets.

Claim 2 (Canceled)

Claim 3 (Currently Amended): The apparatus of claim 2, said adjustable
gripping device further including:
a gripping pin coupled to a rear portion of said gripping device, ~~and~~
~~a~~ the first and a second tightening handle opposing one another, wherein said
first and said second tightening handle adjusts an angle of said adjustable gripping
device in relation to said plurality of light fixture coupling brackets and the light box,
said gripping pin is substantially centered on said rear portion .

Claim 4 (Original): The apparatus of claim 2, said plurality of light fixture
coupling brackets adaptable to couple to a light bar bracket having at least one light set
attaching pin, wherein said at least one light attaching pin couples to a removable light
set.

Claim 5 (Currently Amended): An apparatus comprising:
a light bar having at least one light socket, said light bar including at least one
removable gripping device, said gripping device including a gripping pin substantially

centered on a rear portion of said light bar, said gripping pin removable from said gripping device, said gripping device removably coupled to a plurality of light fixture coupling brackets and first and second tightening handles, wherein said removable gripping device removably coupled to a light box having a plurality of expansion rods coupled to a first and second frame, and each of a plurality of light fixture coupling devices removably coupled to the light bar.

Claim 6 (Currently Amended): The apparatus of claim ~~255~~, wherein said light bar includes at least one light set attaching pin, wherein said at least one light set attaching pin couples to a removable light set bracket.
